# How to map a drive for Mac OSX

7/19/2018

Step 1

To begin mapping a drive, click on 'Go' in the top bar while you are at your desktop.
Then select '**Connect to Server…**'

Step 2

In the Server address box, type in "smb://ServerName/FolderName" and then click on
the '+' to add it as a favorite server. Click '**Connect**'.

Step 3
You will be asked to enter your CSU ID and password, then click **Connect**.

After clicking **Connect**, your newly mapped drive will open up and be listed under 'Favorite Servers'.
